## Real-Time Communication System Powered by AI for Specially abled

	Entice  How does someone initially become aware of this process?	Enter  What do people experience as they begin the process?	Engage In the core moments in the process, what happens?	Exit  What do people typically experience as the process finishes?  Extend  What happens after the experience is over?
Steps What does the person (or group) typically experience?	Find existing solutions  A Person looks for any existing technologies for deaf and mute people  Propose new solution  Finds new methodology to communicate with deaf and mute people	First user experience  At this stage, the user need to go for an application tour  User may take time to use the application	Starting using appliation  Converts sign into voice using CNN  Start understanding the features of the applications  Provide interaction between user and the application takes place	Updating the application  Finding out the new features that can be included  Finding out the new features that can be included  Getting feedback from the user for improving the application Experience
Interactions  What interactions do they have at each step along the way?  People: Who do they see or talk to?  Places: Where are they?  Things: What digital touchpoints or physical objects would they use?	No need of any physical touch points  They can be found at engineers forum	Virtual assistance will be provided for the user  Deaf people share the application experience with others	Communication between deaf/ dump and hormal people made easier  Feel of disability can be supressed with this	Other deaf and dump people Nearby houses and offices
Goals & motivations  At each step, what is a person's primary goal or motivation?  ("Help me" or "Help me avoid")	Find the best model that helps to communicate effectively	Both the deaf and dump people as well as normal people need to understand the system	To improve the system effeciency	Referring the application to others
Positive moments  What steps does a typical person find enjoyable, productive, fun, motivating, delightful, or exciting?	Learning new technologies and User satisfaction	Enjoying the benefits of application	They might forget about their disabilities	Helping others to communicate each other
Negative moments What steps does a typical person find frustrating, confusing, angering, costly, or time-consuming?	User confused with chosing the best model in the river of technologies	Everyone doesn't have the application at early stage	Fear of addiction	not useful for everyone around
Areas of opportunity  How might we make each step better? What ideas do we have? What have others suggested?	Discussions with fellow team mates (Brainstroming sessions)  Getting inputs from affected people	They have an idea of using good applications	With this application the person stay happy and more satisfied	Help others in learning the UI/UX
